TESTIMONIAL

For my internship I was posted to DK OUTSOURCE. It was a 6 week internship. After I found out I was attached to DK OUTSOURCE, I went to its site to find out what they do. It turns out that they did QS. QS was 1 module that I was not really good at. So I was predicting a tough time for my attachment.

On the first day I was introduced to my mentor, Joseph. Joseph was from Phillipine and had previously work at Dubai. He taught me different things about QS. It was a totally different experience from what I learnt at school. It was just like a step by step kind of work. Though I did make a few mistakes here and there. The staff did not get angry but told us not to repeat the same mistake. The staff was quite patience especially during the starting phase where we were still learning.

The interns were given an opportunity to organize a company event. It was a fun learning experience for me as I never had done something like this. This brought the interns closer too. During the event we get to know family and friends of DK staff.

There was also a site visit during the internship. The visit was really an eye opener. We were shown how to go about tendering and other stuff which could not be taught in school. We took pictures of certain parts of building that could be useful during the project. We visited 2 sites and each site conducted its site visit from each other though it was mostly looking at the ongoing site. We took down notes and had to present Mr. Dennis our report.

During the time at DK I learned many different things that could were not being taught in school and some will never be. It was a memorable experience working with the staff of DK. I will like to thank all the staff and Mr. Dennis for making my internship GREAT!!

Yours Sincerely,

Name : Bibas Changbang
