TESTIMONIAL

I was attached to DK Outsource for my internship for 7 weeks from 1 March 2010 to 17 April 2010.

7 weeks may not be long but I had gained lots of valuable knowledge and experiences that I will never be able to have in school. I learnt how to use different measuring instruments to measure the area and the length such as the planimeter. Also, I am given the opportunity exposed to different drawings of different projects, both the structural and architectural works.

Architectural calculation is totally new for me as I did not learn anything related to that before my internship. Fortunately, I am able to ask when I am in doubts without any worries. As for a freshmen like me, it is great to have guidance from friendly and helpful colleagues to clear my doubts patiently. As time goes by, I got to learn more and was able to do more independently by myself.

Besides working in the office, Mr. Dennis Kwok also brought us to quite a few sites. The site visit is an eye opener for me as I did not have the chance to go to any site before I came to DK. Mr. Dennis Kwok brought us to different sites such as detached houses, semi-detached houses, condominium, steel structure, and also the eco garden at Tampinese. He explained to us the different parts of the construction and their purposes. I gained valuable experiences and knowledge during this trip. For example, the eco garden had the toilet bowl which is eco-friendly. It does not have a flush. Instead they use the waste as fertilizers. Mr. Dennis Kwok got the project manager to explain to us how this toilet bowl works and also other parts of the site. The whole concept of the garden is to be environmental friendly.

Internship at DK was a great experience. Last but not least I would like to thank all colleagues and Mr. Dennis Kwok at DK who had guided me along and made my internship an enjoyable one.

Thank you.

Yours sincerely,
