TESTIMONIAL

I had completed my 6-week industrial training program at DK Outsource from 7th September 2009 to 16th October 2009.

I had learnt a lot in construction measurements like how to measure the area and perimeter of the slabs; how to read the drawings on different components of the buildings, and how to do structural and architectural works. From the first beginning, I was totally fresh and I had not got any experience in doing measurement. Fortunately, the manager and quantity surveyors taught me step by step patiently in doing the simple measurement which I felt graceful.

During my industrial training program period, I had attended three site visits which were organized for industrial training program students like me. They were truly an eye-opener experience as we had got to visit upgrading and upcoming excitements such as lift upgrading program, Tampines Eco Green, Gardens at the Bay and Marina Barrage. Mr. Dennis shared his project experience with us.

This ITP was indeed a precious opportunity for me to experience the work environment. There was a place for me to apply my technical and business knowledge. It was a pleasant internship experience at DK. I am so graceful that I gained a different learning experience in DK. In additions, all the staff in DK are kind-hearted and they really showed their care and concern to me during my ITP period.

Thank you.

Yours sincerely,
